

How many LANCOM VPN clients in trial version mode can establish a VPN connection to a LANCOM router?

Information:

The LANCOM Advanced VPN Client can be used in full for an initial installation for 30 days in unlicensed trial version mode. **After these 30 days, the product must be activated with a corresponding license for further, unlimited use.** You can obtain the licenses from specialist retailers or distributors.

A LANCOM router accepts a maximum of three simultaneous VPN connections from LANCOM Advanced VPN Clients, which are in 30-day trial version mode. All other connection requests from VPN clients that are in this mode are rejected by the router.
